ATTACK — When you command your Pokémon to attack, they gain any benefits that would normally apply only to you. On a success, the damage roll uses **your Proficiency** and **their damage die**. The standard attack starts at **d6 • Melee**.

STRESS — When your Pokémon takes damage, mark Stress by threshold: at or above **Minor 1**, **Major 2**, **Severe 3**. Marking their last Stress drops them out of the scene until your next long rest (they return with 1 Stress cleared). Downtime moves that clear your Stress clear theirs equally. **EXPERIENCES** — starts with **+2 in two**; gains one whenever their trainer does.
